### Product Family Overview

**NEMA, Size 0**  
**Full Voltage Non-reversing Starter**

## Product Description

Eaton's Cutler-Hammer Intelligent Technologies (IT) Electro-Mechanical line of Contactors and Starters is the result of a substantial engineering, manufacturing and marketing effort involving extensive customer input, combined with new advances in solid-state technology. IT Electro-Mechanical products have greatly increased functionality, significantly reduced size and utilize the benefits of 24V DC control. The exclusive Pulse Width Modulation (PWM) control and digital microprocessor generate a minimized DC value which reduces energy to the contact block and provides the most compact system available.

## Standards and Certifications

- Standard: Designed to meet or exceed UL, NEMA and CSA
- UL Listed: UL File #E1491, Guide #NLDX — Open, UL 508
- CSA Certified: CSA File #156828, Class #3211 04 Open, C22.2 No. 14-95
- CE
- NEMA ICS1, ICS2, ICS5

## ISO 9002 Certification

When you turn to Eaton's Cutler-Hammer Products, you turn to quality. The International Standards Organization (ISO) has established a series of standards acknowledged by 91 industrialized nations to bring harmony to the international quest for quality. The ISO Certification process covers 20 quality system elements in design, production and installation that must conform to achieve registration. This commitment to quality will result in increased product reliability and total customer satisfaction.

**Catalog Number Selection (Open Components)**

Table 1. *IT*. Electro-Mechanical Catalog Numbering System

**Note:** When using the Catalog Numbering System for Eaton's Cutler-Hammer *IT*. Electro-Mechanical products, care should be exercised to assure that the Catalog Number for the Overload Relay aligns with the *IT*. Contact Block selected for type, frame size and ampacity, if purchased as separate components.

**Examples:**

- N101BS0J3A — Full Voltage Non-reversing, Size 0 Starter with a 10 – 32 amp overload range
- N111FS5X3N — Full Voltage Non-reversing, Size 5 Contactor
- N501DS2K3A — Full Voltage Reversing Starter with a 14 – 45 amp overload range
- N02NCXCXNN — Coil Controller 54 mm
- N04NBSAX3N — Contact Block Size 00

## Product Description

The Cutler-Hammer Intelligent Technologies (IT.) Electro-Mechanical Contactor by Eaton Corporation consists of an IT. Electro-Mechanical Contact Block and IT. Electro-Mechanical Coil Controller as a Full Voltage Non-reversing (FVNR) or Full Voltage Reversing (FVR) device. Size 00 to Size 4 Contact Blocks combined with Coil Controllers (factory or field assembled) are stand-alone Contactors. Only the Size 5 Contactors have internal factory assembled coil controllers.

## Features

- Size 00 – 5, 9 – 270A, 2 – 200 hp, 600V
- 24V DC Coil Control — safe, reliable global standard
- Frame width (mm): 45, 54, 76, 105, 140
- No laminations, shading coils or magnet noise
- -40 to 149°F (-40 to 65°C) operating temperature
- No seal in auxiliary contacts required — control wiring is not needed between the contactor and overload relay
- Conformal coated printed circuit boards for resistance to harsh environments
- Unique Pulse Width Modulated coil controller minimizes coil power consumption
- Microprocessor-based control
- Easily accessible mounting feet for panel mounting
- Meets or exceeds global standards for EMC (Electromagnetic compatibility) immunity and emissions
- Front and side mounted Auxiliary Contacts: 1NO, 1 NC, 2NO, 2NC, 1NO/1NC and logic level

- 2- or 3-wire control
- Built-in logic to provide either 2- or 3-wire control, eliminating the need to provide and wire auxiliary contacts to seal in and interlock the contactor coils
- Easy field assembly of control wiring — plug and unplug lockable control connector
- DIN rail mounting for Sizes 00 – 2
- Optional mounting plates for Size 00 – 4
- Common accessories
- Long-life silver nickel and silver tin oxide contacts provide excellent conductivity and superior resistance to welding and arc erosion
- Environmentally friendly materials
- Low wattage coils and minimal heat dissipation

## Reversing Contactors

- Includes Reversing Power Wiring and bus bars
- Mounting plates for Size 00 – 4
- Exclusive internal electronic interlock for reversing
- Field installed Reversing Kits
- Unique coil controller energizes both forward and reverse contactors — one control point for wiring

**Product Selection**

**Non-reversing Contactors**

**When Ordering Specify**

NEMA Size, Continuous Ampere Rating, Voltage, kW/hp and Non-reversing or Reversing

**Note:**

- An **N111** (Size 00 – 4) consists of an **N04N** (Contact Block) and an **N02N** (Coil Controller), factory assembled.
- An **N111F** (Size 5) has an internal coil controller, factory assembled.

Cat. No. N111BS0X3N

**NEMA Full Voltage Non-reversing Starter, Size 0**

**NEMA Full Voltage Reversing Starter, Size 0**

**Product Description**

The Cutler-Hammer Intelligent Technologies (IT.) Electro-Mechanical Starter by Eaton Corporation consists of an IT. Electro-Mechanical Contact Block or Contactor and IT. Electro-Mechanical Solid-State Overload Relay as a Full Voltage Non-reversing (FVNR) or Full Voltage Reversing (FVR) device. Size 00 to Size 5 Starters are factory or field assembled.

**Features**

- 24V DC control power — safe, reliable global standard
- Unique Pulse Width Modulated (PWM) coil controller minimizes coil power consumption
- Microprocessor based control
- Phase loss and current unbalance protection, user selectable
- Standard selectable Trip Class 10, 20 (factory default) or 30 — no individual part numbers — no programming software
- Ambient compensated overload
- Motor temperature and power-up protection with thermal memory
- Front and side mounted Auxiliary Contacts: 1NO, 1NC, 2NO, 2NC, 1NO/1NC and logic level (1NO/1NC)
- Easily accessible mounting feet for panel mounting
- LED status indication — trip, trip class, motor thermal state, reset, overload state
- Unique “Alarm without Trip” option for critical must run applications
- Lockable overload cover protects against unauthorized adjustment and reset functions

- No control wiring needed between contactor and overload relay — eliminates seal in auxiliary contacts
- Minimal heat — no full voltage coils
- -40° to 149°F (-40° – 65°C) operating temperature
- Wide 3.2:1 current adjustment range
- Exclusive internal 24-bit floating point math calculations with RMS calibrated current measurement
- Meets or exceeds global standards for EMC (Electromagnetic compatibility) immunity and emissions
- IP20 Finger Protection
- Motor running thermal utilization indication
- Manual, Automatic or Remote Reset
- Easy field assembly of control wiring — plug and unplug lockable control connector
- DIN rail mountable, Size 00 – 2
- Communication Interface with Starter Network Adapter Product (SNAP)
- 2- or 3-wire control
- Solid-state alarm output indication
- Optional mounting plates with “Ease of Installation” slotted hole design
- Type 2 Coordination
- Conformal coated printed circuit boards for resistance to harsh environments

**Reversing Starters**

- Includes Reversing Power Wiring and bus bars
- Mounting plates for Size 00 – 4
- Built-in electronic interlock for FVR units
- Unique overload board energizes both forward and reverse starters — one control point for wiring

### Starters — Full Voltage, Non-reversing and Reversing

## Product Selection

### Non-reversing Starters

#### When Ordering Specify

NEMA Size, Continuous Ampere Rating, Voltage, kW/hp, Non-reversing or Reversing and Overload Adjustment Range (Amperes)

#### Note:

- An **N101** (00 – 4) consists of an **N04N** (Contact Block) and an **N05N** (Non-reversing Overload Relay), factory assembled.
- An **N101** (Size 5) consists of an **N111F** (Contactor) and an **N05N** (Non-reversing Overload Relay), factory assembled.

<b>Pull-In Time (mS) @ 24V</b>					
Excl. Debounce Time	15	15	25	30	70 – 200
Incl. Debounce Time	75	80	88	95	120 – 300
<b>Dropout Time (mS) @ 24V</b>					
Excl. Debounce Time	5	5	12	15	50 – 150
Incl. Debounce Time	65	70	75	80	70 – 250

① Use Class B 75°C copper wire only (or 90°C copper wire sized for 75°C operation per NEC).

② Consult factory for higher ratings.

③ The Non-reversing Starter requires the use of all six mounting screws for the maximum rating.

**Note:** At other temperatures expressed in °C, for either inrush or sealed, use the 20°C value from the table in the following

$$\text{Watts} = W_{20} [1.1 - .005(T)] \text{ and} \\ \text{Amps} = A_{20} [1.1 - .005(T)]$$

For example, inrush requirements for a NEMA Size 2 Starter at -25°C would be:  
Watts = 130 [1.1 - .005 (-25)] = 160  
Amps = 5.4 [1.1 - .005 (-25)] = 6.6

**Notes:**

■ Response time for Control Inputs = Debounce Time

■ The time between operating forward and reverse must be greater than the Debounce Time.

Table 7. 24V DC Power Supply Requirements @ 68°F (20°C) (see Note at left)

Technical Data and Specifications

Electrical Life — AC-1, AC-2, AC-3 and AC-4 Utilization Categories

Table 8. Utilization Categories

Category	Typical Application
AC-1	Non-inductive or slightly inductive loads: Resistance furnaces, heating.
AC-2	Slip-ring motors: Starting and stopping of running motors
AC-3	Squirrel cage motors: Starting, switching off motors during running (motors in most industrial applications typically fall into this category).
AC-4	Squirrel cage motors: Starting, plugging ①, inching ② (very few applications in industry are totally AC-4).

① Plugging is stopping or reversing the motor rapidly by reversing the connections while the motor is running.  
 ② Inching or jogging is energizing the motor once or repeatedly for short durations to obtain small movements of the motor driven load.

**Life Load Curves** — Eaton’s Cutler-Hammer 17. Electro-Mechanical Series NEMA contactors have been designed and manufactured for superior life performance. All testing has been based on requirements as found in IEC 60947-4-1 and conducted by us. When selecting a contactor, the specifier must give attention to the specific load, utilization category and the required electrical life. For a definition of Utilization Categories, see **Table 8** above.

**Note:** AC-3 tests are conducted at rated device currents and AC-4 tests are conducted at six-times rated device currents. All tests have been run at 460V, 60 Hz.

Actual application life may vary, depending on environmental conditions and application duty cycle.

**Contactor Choice** —

- Decide what utilization category the application is and choose the appropriate curve from **Figure 1** or **Figure 2**.
- Locate the intersection of the life-load curve with the operational current (Ie) of the application, as found on the horizontal axis.
- Read the estimated contact life along the vertical axis in number of operations.

Auxiliary Contacts

Auxiliary Contacts are available for mounting on Eaton’s Cutler-Hammer Intelligent Technologies (IT) Electro-Mechanical Contactors and Starters. The various choices available for non-reversing models are shown in **Tables 12 and 13**, and their ratings in **Tables 14 – 16**. For reversing models, the number of auxiliaries indicated is for each of the contactors/starters in the assembly.

### Accessories — DSNAP

## DeviceNet Starter Network Adapter Product (DSNAP)

Catalog Number D77B-DSNAP  
with 54 mm IT. Starter

The DeviceNet Starter Network Adapter Product (DSNAP) is a front-mount device that serves as a single node on DeviceNet, providing communication capability, control and monitoring to Eaton's Cutler-Hammer Intelligent Technologies (IT.) Electro-mechanical Starters, as well as the S751 Soft Start, as listed in Tables 18 – 19.

When HAND/OFF/AUTO is required, the HOA option will allow for the connection of hard wired operators. This option allows for Hand Control even if the DSNAP is not connected.

The product greatly increases the functionality of the IT. Electromechanical Starter and S751 Soft Start with the addition of enhanced features.

The IT. DSNAP is designed for use with the same 24V DC power as the starter. A starter power sensing circuit indi-

cates to the user that the starter does not have 24V DC power, signaling a fault or an E-Stop.

### General Features

- Communication to DeviceNet consuming one DeviceNet MAC ID
- Manually set MAC ID and baud rate; configuration using a software application is not required for normal operation
- Advanced configuration using CH Studio software
- Includes pre-wired starter interconnect cable and terminal adapter

### Comprehensive Motor Data and Control

- RMS average current
- % of operating FLA
- % thermal memory
- Integral contact position detection
- Operating status and fault codes
- At speed (soft starters)
- START/STOP control
- RUN/FORWARD-REVERSE control
- Trip Reset

### Extended Starter Capabilities

- Ground fault detection (with accessory)
- Fault log
- Current level warning (adjustable)
- Underload warning (adjustable)

### Approvals (Pending)

- UL508
- CE
- CSAC22.2 No. 14-95

Figure 7. Typical DSNAP Application

### Application

In a typical application, the DSNAP front mounts to an IT. starter or soft start. The DSNAP connects directly to DeviceNet, allowing for control and monitoring of the starter/soft start. A PC or PLC serves as the central control and scans the DSNAP for motor control and monitoring information.
